## Invitation

I invite the archangels Michael, Gabriel, Raphael and Uriel to position themselves around us in order to keep us in the energies of Light, Love and Peace throughout this encounter with the Sacred Light. I invite our brothers and sisters of Telos, the High Council of Telos: Adama, Ahnahmar, Aurelia, the Masters of the Seven Sacred Flames.

I also invite our I AM Presences, our Inner Divinities to be with us today in a very special way so that we can open our hearts to welcome the energies that are being poured on our group at this time, as well as the energies of the Full Moon, which just ended, to anchor them and welcome them into each of our cells, into each of our bodies.

We also invite all the angels, the archangels and all our Guides to surround us, to come and share with us this moment of Eternity. We also invite our lineages, all our ancestors so that they too may receive the energies of Light and Love from this encounter, from this point of Eternity in space... from the non time... from the non-space.

I also invite a representative from each of the Kingdoms that accompany the human race on this Planet: the minerals, the plants, the animals, the marine world, the insects and the birds; all the Kingdoms, even those I forget and who truly share Life in this dimension with humanity. I invite one of their representatives to bless our group with his love, his wisdom, his Light and his understanding of Life.

I emit the intention, for each of us today, that we receive this Light in our hearts; that it makes us grow and helps each of us, to open doors within us, to welcome the Great Life, the True Life, the one that leads us, helps us, supports us and shows us the great path towards our perfection.

I also invite our brothers and sisters from the Intra-Earth, from all the Cities of Light who want to come and share with us this Light, this Love. I also invite our brothers and sisters from the stars, the planets of the Solar System, the Sun, the planet Venus, all those in the worlds of Light Dimensions who want to come with us to taste the energetic flavor that we are radiating at this moment.

And I ask the Source, God Father-Mother Creator, the Divine Mother to bless our group, our hearts and the hearts of all those who are gathered in this place in the visible and invisible dimensions so that Light, Love, Peace and Harmony can reign in this dimension.

We also intend that this Light focus radiates throughout the Planet and touches the hearts of all our brothers and sisters on Earth, our brothers and sisters of humanity to bring them hope, harmony, peace, Love, wisdom.
